Mission.

One of our main objectives is to provide university students and professional researchers with multiple opportunities to receive a broad-spectrum training.

To this end, we have an ongoing commitment to creating multidisciplinary, practical field schools, theoretical courses, and both introductory and advanced classes on a variety of topics within the discipline.

Manifesto.

We continuously strive to produce concrete results, to be made known to the public through scientific and academic publications, as well as media disclosure through new means of communication.

Hence, developing enduring partnerships with academic institutions and universities, as well as with governmental agencies and public associations, is one of the core principles of our Institute.
